Instructions for Taking the Test

Read the rules and regulations carefully before the test:

1. Switch off your mobile phone and electronic devices.
2. Manage your time strictly to **20 minutes** per passage, reading questions first to guide your skimming and scanning for answers, always paying close attention to word limits and matching synonyms.
3. Read the instructions thoroughly before answering the questions.
4. Read the questions carefully to avoid silly mistakes.

Before taking the test, kindly subscribe to our YouTube channel to help us grow. You'll receive IELTS reading practice lessons on a daily basis!

Academic Reading Practice Test 1

Adam's Wine

A. Water is a life-giver as well as a life-taker. It spans the majority of our planet's surface and has had a significant role in human evolution. According to current projections, it's a factor that will become even more important.

B. Water has played a vital role in our lives throughout history. Water has always had a thorny relationship with humanity, on the one hand providing immense benefits not only as a supply of drinking water, but also as a source of food, a means of transportation, and a means of trade. However, because people have been obliged to live near water in order to survive and thrive, the relationship has not always been pleasant or productive. Contrary to popular belief, it has been the exact opposite. What started out as a survival necessity has turned out to have a highly destructive and life-threatening side in many cases.

C. People and their environment have been hit by big floods and long droughts throughout history, making it harder for them to fight for their lives. The dramatic changes in the environment that we hear about in the news every day are not new. Fields that used to be green and full of life are now empty. Lakes and rivers that used to be full of life are now empty. Savannas have become deserts. What might be new is our childlike amazement at the forces of nature.

D. Today, we know more about how climates change around the world. Floods in faraway places have an immediate effect on the whole world. Maybe these things make us feel better when floods and other natural disasters are destroying our own property.

E. In 2002, floods in several parts of Europe caused a lot of damage that cost billions of euros to fix. Properties all over the continent fell into the sea as waves thumped the coast and destroyed sea defenses. But it was not just the sea. Rivers that were deformed by heavy rains and the loss of trees carried large amounts of water that ruined many communities.

F. The costly short-term solution is to build better and more sophisticated flood defences along rivers. There are less complicated options. Tree planting in highland areas, not just in Europe, but also in locations like the Himalayas, to safeguard people living in low-lying areas like the Ganges Delta, is a less expensive and more appealing alternative. Countries are already being persuaded that the release of carbon dioxide and other greenhouse gases is affecting significant environmental damage. In this area, however, further work is needed.

G. What about the future? According to projections, two-thirds of the world's population would be without fresh water by 2025. However, the future has arrived in a rising number of parts of the planet. While floods have wreaked havoc in certain areas, water scarcity is generating strife in others. The Rio Grande failed to reach the Gulf of Mexico for the first time in 50 years in the spring of 2002, pitting the region against the region as they compete for water supplies. Due to drought and growing water usage in many regions of the world, there is currently discussion of water becoming the new oil.

H. Other doom-laden predictions claim that, as the polar ice caps melt, coastal regions and some low-lying islands will almost certainly be drowned by the water. Popular exotic sites, which are today frequented by tens of thousands of tourists, will become no-go zones. Today's vacation attractions in southern Europe and others will literally become hotspots, making them too hot to live in or visit. It's impossible not to despair in light of the current weather's irregular behavior.

I. Some may argue that this pessimism is unfounded, but there has been plenty of evidence that something is wrong with the climate. Flooding has been destructive in many regions of the globe. The catastrophe shifts from one continent to the next as the seasons change. The cost of living is sad, and the environmental impact is worrying. We'll have to get used to it.

Adam's Wine IELTS Reading Questions

Questions 1-8

This reading passage has eight paragraphs labeled A-I.

Choose the most suitable headings for paragraphs B-I from the list of headings below. Write the appropriate numbers (i-xii) in boxes 1-8 on your answer sheet.

Note: There are more headings than paragraphs, so you will not use all of them.

List of Headings

- II. Water shortages
- III. Rivers and waves wreak havoc.
- IV. Is it reasonable to be pessimistic? Or is it more realistic?
- V. Climate disasters make us feel better.
- VI. Water, the source of nourishment
- VII. How to deal with a flood
- VIII. Widespread floods
- IX. Relationship between humans and water
- X. Water's devastation in the past
- XI. Future flooding
- XII. A negative outlook on the future

- 1. Paragraph B
- 2. Paragraph C
- 3. Paragraph D
- 4. Paragraph E
- 5. Paragraph F
- 6. Paragraph G
- 7. Paragraph H
- 8. Paragraph I

Questions 9-11

Choose the appropriate letters A-D

9. The author contends that

- A. every day, the news we read and watch on TV amazes us.
- B. We're petrified in the face of environmental changes.
- C. every day, the news we read and watch on TV should not amaze us.
- D. Nature has surprised us with its ability to alter the surroundings.

10 According to the writer,

- A. People do not need to become habituated to environmental destruction.
- B. People will have to adapt to climate changes than harm the environment.
- C. People are currently more accustomed to environmental devastation than in the past.
- D. The widespread pessimism over environmental transformations is unjustified.

Questions 11-13

Do the following statements agree with the information given in the reading passage?

Write

TRUE if the statement agrees with the information

FALSE if the statement contradicts the information

NOT GIVEN if there is no information on this in the passage

11. Humanity's connection with water has always been fraught.

12. Half of the world's population will lack access to clean water in the year 2025.
