Technology Vocabulary PDF

Examples of IELTS speaking part 1 Technology Vocabulary

Use these questions to learn some important **IELTS Technology Vocabulary** for speaking part 1.

1. Are you comfortable using modern technology?
I feel I am a **technophobe** myself because I don't know about the latest technology and don't use any **gadgets**. I am not interested in learning about modern technology and I prefer to keep myself away from such things

2. How do you protect your personal information on your computer?
I am aware that many **cybercrimes** occur every day in this world. So I stopped using **pirated** content and **downloaded** and installed antivirus **software** on my computer. This will protect my computer from any potential threat to the **data** on my computer.

3. Do you use any modern technology at your home?
My brother is a **techie** and he has bought a lot of **IoT**-enabled devices which is used at our home. These devices can be controlled using some **apps** on his **smartphone** with an **internet** connection. We also use the internet using a **wireless** router.

4. How do you think technology has changed in the last decade?
The number of **websites** available on the internet has increased and we are able to access many **e-books**. We can use can transfer money online using **Electronic Funds Transfer** technology.

5. What are the advantages of technology?
Technology has helped us bring the world close to us. We can now see anyone in the world from anywhere using **video conferencing**. We can use **social media** to find and make friends online.

Examples of IELTS speaking part 2 Technology Vocabulary

A few examples of *IELTS Technology Vocabulary* for speaking part 2 are highlighted below.

- **Describe a time when you started using a new technological device**

I would like to talk about the first time I used a smartphone.

I got my first **smartphone** in 2016 when joined college. It was a basic smartphone from the Motorola brand. It was a new experience for me. I quickly learned how to use it and **downloaded** many **social media apps.**

I took this phone daily to my college. I felt that I had access to everything through my phone. The phone was very smooth to use for one year and after that, it started to **hang** and become slow. I had heavy use with the phone as I used it to **browse** the internet, check **emails**, make calls and use social media.

There were so many functions in the phone that I didn't need the help of any other **gadgets**. I even reduced using my **laptop** as my phone was easy to carry around. The phone also had a good **camera** so I didn't have to buy a camera.

I feel most people would have gone through the same experience as mine.

Examples of IELTS speaking part 3 Technology Vocabulary

Check out the **IELTS Technology Vocabulary** below for some important words for speaking part 3.

1. What is the best age to start using the internet?
Small children and adults have become **addicted** to **surfing** the net. I think the best age to start using the internet is after 15 years of age when they get an understanding of the pros and cons of using it.

2. Do you think people will increase their usage of social media in the future?

Yes, nowadays most people are **glued to the screen** and spend a lot of time using their phones. In the future social media will be an **indispensable** part of everyone's lives.

3. Does technology help in students' learning?

As a student technology has helped me get a lot of **innovative** ideas as I could explore a lot of study material from the internet. I wanted to become a **software developer** and the internet has helped me a lot in learning to **code.**

4. Why are people using their mobile phones more these days?

Smartphones have become an inevitable part of our lives and I feel we cannot live without them nowadays. The dopamine released in our brains gives us pleasure and satisfaction and hooks us for longer periods of time on the phone. People also spend more time on **e-commerce** websites looking for something attractive to buy.

5. How do you think people nowadays watch movies?

With the introduction of OTT now people have moved to smartphones and tablets to watch movies. They feel it is convenient to **stream** movies through different movie apps. I think OTT technology has become a **breakthrough** for the movie industry.
